„Space - the Birth of a New Era“

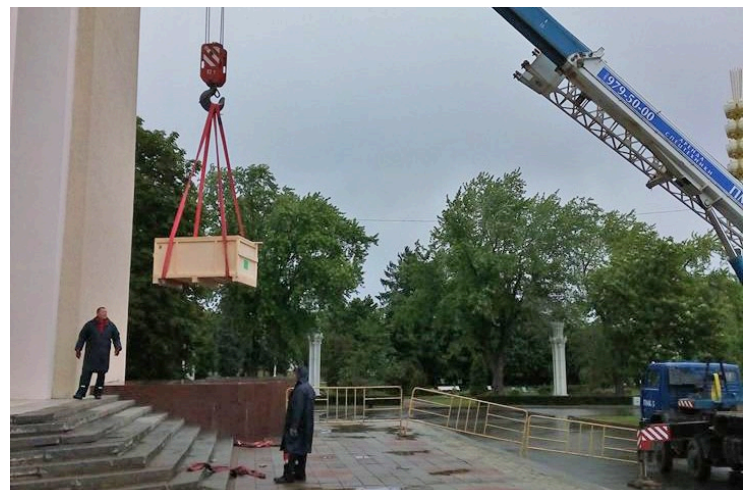

Pictures: BTG Expo

The Moscow VDNH fair-ground can once again boast a new and extremely interesting exhibition.

Since the end of June, the exhibition „Space - the birth of a new era“ has been taking place in the centrally located Pavilion 1. By means of many contemporary exhibits, this exhibition helps convey the history of Russian space travel to the visitors.

Visitors have until 10th January to make their own impression. As an official logistics partner for this event, we were responsible for the transports to the venue, as well as for the handling on site.

Green Logistics

As a shareholder and depot of the international groupage cooperation „Vernetzte Transportlogistik GmbH“, BTG Neuss this year participated in the CO2 data collection to determine progress in the reduction of greenhouse gases during the transport process.

The result is impressive:

BTG Suisse AG

Switzerland

According to the consignment table 2016, the CO2 emissions of BTG Neuss were reduced by 8.8% in comparison to 2014!!!

This success is above all due to the consistent truck fleet renewal, implementing the latest exhaust gas treatment (EURO 6) and lower fuel consumption. In addition, appropriate training courses for the drivers in fuel-saving driving modes also contributed. We congratulate Mr. Schenk and his team for the encouraging development on the road to more sustainable transport management.

Live at Düsseldorf airport

On 21st September 2016 the trainees of BTG Neuss had the opportunity to experience the handling and loading of airfreight consignments on site at Düsseldorf airport.

Thanks to the airline agent - Kales Airline Service, Düsseldorf - they were able to inspect an Air China aircraft (type A330-300) from the cockpit on to the first / business / economy class and even the underfloor space, the so-called belly capacity.

With the professional guidance of Mathias Müller - Air Traffic & Sea Freight Manager, BTG Neuss - no questions were left unanswered.

In addition to their lunch of Pizza, another "highlight" was witnessing the landing of an Emirates Airbus A380, which has lately been a regular guest in Düsseldorf and which rounded off an eventful day for the trainees very nicely.

BTG Plochingen: High-Quality Robot Systems for Australia

Picture: BTG

On behalf of Buck Engineering & Consulting GmbH (BEC), the air & sea freight team in Plochingen is currently organizing a transport to Geelong, Australia.

The shipment consists of a 20 foot flat rack container and a 20 foot open-side container. The goods are high-quality robotic systems, which are to be delivered to the end customer.

Before planning began, the loading conditions at the customer's premises were checked, in order to arrange the right vehicle for loading.

A side-loader vehicle was chosen, which could load the containers independently. Due to the sensitivity of the goods, a transport route with the minimum required transshipment possible was chosen.

The shipment will be loaded from Wörth am Rhein to Ant-

werp and then on to Melbourne.

In addition to the handling of the sea freight, BTG also assisted BEC in the preparation of the accompanying export documents.

At the end of this year, further containers are scheduled to be transported to Australia. (For more information on Buck Engineering & Consulting GmbH, please visit www.b-e-c.de)

BTG Bremen shows Athletic Talent!

The 9th Bremen Company Race took place on 20th June in Bremen's typical stormy weather.

Starting at 6 pm, the various teams set off at one-minute intervals: All in all, 230 Bremen companies were represented - with a total of 3,700 runners.

Despite the heavy rain, they completed the approx. 5 km long route from the Sielwall Ferry to Café Sand. The focus

was not on being the fastest, but rather on team spirit, the co-operation between colleagues and, of course, the sport itself. At the same time, the colleagues from BTG Bremen were running for a good cause, as a part of the race entry fee benefits the „Special Olympics“ club in Bremen, a sports organization for people with mental disabilities.

The BTG employees in Bremen had lots of fun and are already looking forward to next year's race!

Dual Study Programme - Our Management of the future

From left: Doris Walter (Programme Coordinator of the University of Bremen), Alina Knoll, Prof. Dr. Jan Dethloff (Course Director)

With great pride the BTG team congratulates Mrs. Alina Knoll on the successful completion of her business economics studies B.A.

This is a great example of the successful combination of theory (taught at the University of Bremen) and practice (at BTG Bremen).

After successfully completing her apprenticeship as an agent for freight forwarding and logistics services at BTG Neuss, Frau Knoll then decided to build on this solid foundation by going on to study for 7 terms (theory and practice), including the final Bachelor thesis.

Training and further education has always been a priority for the BTG Group, because well-trained, motivated and eager employees are one of the most important pillars and success factors for BTG Internationale Spedition GmbH.

And whoever masters the permanent balancing-act between

job and lectures so well, is showing at an early stage that they are capable of mastering future management tasks.

Mrs. Knoll has achieved this splendidly and BTG Bremen has been active as her partner and companion during the fascinating and exciting time of studies.

Not only these early and close ties to BTG Bremen, but also the quality and focus of the practice-oriented phases of her studies have ensured this success.

A dual degree
in logistics -
a model with a future!

IRAN - BTG is already there!

Hall 38 Tehran
Int. Permanent Fairground
Pictures: BTG

With the introduction of „Implementation Day“ on 14th January 2016, Iran's 80 million citizens' market became internationally accessible again.

This creates enormous opportunities for the European economy and has triggered a big run on Iran.

An immediate result of the easing of sanctions was a revival of the trade fair business. This was also reflected in the numerous official German participations, which were launched within the shortest possible time in the context of the Foreign Exhibition Programme.

BTG has already been commissioned several times to process the exhibition logistics for exhibitors, both within the scope of the Foreign Exhibition Programme as well as on behalf of various German, Iranian and Russian organizers. In addition to transporting

the goods, we also took care of customs clearance and handling at the various exhibition sites.

We would be delighted to help you with your trade fair participation in Iran and look forward to receiving your enquiries.

Shahr-e Aftab (Sun City) Fairground

While many exhibition forwarders were "waiting in the wings" - we had already been appointed for the first fairs: Iran Oil Show, Iran Health, Iran Rail Expo and Iran Plast in Tehran, as well as for the Agrofood / Agropars in Shiraz and the iFood Expo in Mas-had. At the above exhibitions we took care of the exhibits of customers from Germany, Switzerland, Russia, Austria and various other countries.

BTG Expo GmbH Innoprom 2016 - Ekaterinburg

Pictures: BTG Expo GmbH

With 50,000m² of exhibition space, 600 participating companies and more than 150 accompanying lectures and conferences, the INNOPROM, which takes place annually in Ekaterinburg, is by far the largest exhibition in the Ural region.

Focusing on six different industries, such as „Industrial Automation“, „Metropolitan

Technologies“, „Power Systems“ or „Mechanical Engineering“, the Innoprom creates a unique platform for all leading Russian producers and also for their international partners and competitors.

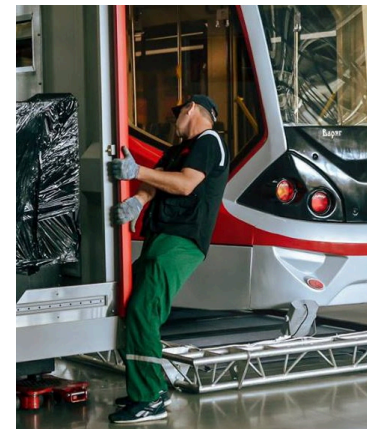

As the official site agent, OOO BTG Exhibition Logistics - a subsidiary of BTG Expo GmbH - is responsible for the efficient handling of all consignments

and exhibits. These can include anything from metalworking machines to commuter trains or mining equipment.

We are therefore very pleased to report that this year once again, all consignments were delivered reliably and on schedule.

Patriot Expo 2016 - Moscow

To our great delight, we recently had the opportunity to work at Moscow's newest fairground - PATRIOT EXPO. This new venue is located about 60 km outside of Moscow and boasts an impressive indoor exhibition area of 40,000m² and an external area of 120,000m².
